

Fitting E-Containerlock

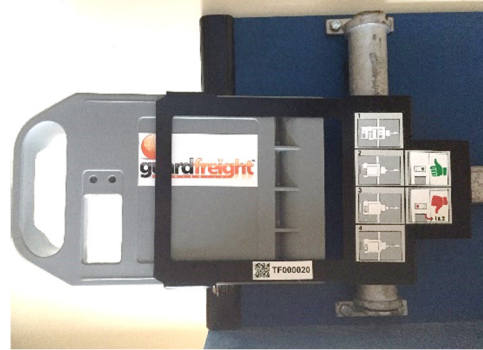

Prior to fitting the device will be inactive

Just prior to fitting prepare the unit for fitting and activation by opening the metal slide. The activation LED sequence will start with flashing red/green LEDs

After 30sec wait for a solid red LED. This confirms the device is ready to be fitted. Do not close the slide.

Fit the unit onto the locking gear.

Close the metal slide

Insert seal body. Do not close

10sec Green LED confirms activation

Secure seal
